

Welcome to join us at Sida for World Water Day 2018:

Leave no one behind – the water gap

The water crisis affects the poorest most - from slums to remote rural communities, refugee camps and disaster-prone communities, and particularly those marginalised by income, gender, caste, age or disability. As a result, the poorest live and die in conditions unthinkable to us in the developed world, unseen and unheard.

For this year's World Water Day, WaterAid and Sida invite you to a discussion on how we ensure that no one is left behind when we talk about water for everyone everywhere.
